

1	one	1
	Thus, I came to the conclusion that the designer of a new system must not only be the implementer	2
	and first large-scale user; the designer should also write the first user manual.	3
	The separation of any of these four components would have hurt T <sub>E</sub> X significantly. If I had not	4
	participated fully in all these activities, literally hundreds of improvements would never have been	5
	made, because I would never have thought of them or perceived why they were important.	6
	But a system cannot be successful if it is too strongly influenced by a single person. Once the initial	7
	design is complete and fairly robust, the real test begins as people with many different viewpoints	8
	undertake their own experiments.	9
